

Hand Hygiene Auditing Tool

IPAC Consulting Hand Hygiene Auditing Tool allows those responsible for hand hygiene auditing to collect data with ease through our automatic electronic recording program. Unlike many other hand hygiene auditing tools this is simple to use, requires very little infrastructure to support the program and is the most cost effective of programs on the market.

This program allows you to:

- Provide timely feedback for your units and worker groups
- Avoid paper based data collection
- Alleviate any extra workload required for transcription
- Produce instant reports generation
- Generate useable data with the ability to subset your data between months, years, units, worker groups and provide comprehensive data for public reporting.
